

Dear Doctor Henning

Let me introduce my self. I am the widow of Alfred Friendly of the Washington Post and we have had a house in Side for 26 years. I have known Prof Inan a very long time and she asked me to write this letter for her.

First she wants to thank you very much for sending the cast and mold of the bronze head in your collection. It was safely delivered by Prof Mellink to the museum in Antalya where Prof. Inan saw it yesterday.

She is unable to work on it right away as she is very involved with the restoration of the Temple of Apollo in Side. This is my particular project and I have come from Washington to urge on the finish of the work.

Prof Inan will write you immediately when she has the results of the study of a head.
