Professor Feza GURSEY  
Middle East Technical University  
Physics Department  
ANKARA, Turkey

Dear Feza,

Thank you very much for your letter of December 16 which I got at the same time with Günaydin's application. As I told him I can not give a definite answer until we know our budget for the next academic year which will be sometimes in March. Under these conditions I do not know how many postdoctoral positions if any I will get for physics. As soon as I know how things are I will let you know. Frankly I am not everoptimistic but not totally pessimistic either.

I am very sorry to hear you will not be able to come to Scuola Normale this year. It would have been so nice to have you here for some time especially since now our chances of meeting are getting rarer and rarer. How about the next academic year? Could you drop me a line before February if you think this at all possible. I would then include your name amongst the few scholars Accademia dei Lincei invites every year to Scuola Normale.

I would be very glad to come to Ankara when you are there, but I am not sure I have anything interesting to say and at any rate I could not come before the middle of May or early June and only for a couple of weeks. This may be totally incompatible with your time table and I doubt whether such a short visit is worth while for you.

What are your plans for the next year? I will probably accept an invitation from Tomozawa to visit Michigan during the fall term. Will you be back to Yale by then?

Best regards to Suha and to Yusuf - is he with you now - and best wishes for a happy 1973

*yours ever*
