Istanbul, 13. November, 1991

Dear Mr. Lawrence M. Kaye
and Mr. I. Rand Scott Tross,

The cast of the lower part of the Herakles Statue at Antalya Museum was finished. It took a great deal of my time and effort and I was sometimes frustrated by the difficulties involved in making it but now, at last it is finished.

Please fax your answers to the following questions to me at the fax number in Istanbul: 90- 1- 180 56 27

1. Is the cast of the upper part of the statue from the Boston Museum Leon Levy Collection finished?
2. Did they make the cast without the supporting part?
3. Did Mr. Horn make drawing of the upper part of the Boston Museum and Leon Levy Collection with measurements? If so, please fax these too.
4. Did you ask the other party not to replace the obstacle until after the end of the experiment?
5. In the meantime, I have learned that the metal rod can be removed with a special drill without damaging the statue. Please explain this Mr. Vermeule and Mr. Levy so that they can remove the metal rod also.

I will stay in Istanbul until 2. January. I would like to take part in the experiment.

Can you fax or call me as soon as possible, I would like to see the cast and the original piece at least two days before the experiment take place.

I look forward to hearing from you.

My best wishes,
Prof. Dr. Jale Inan
