

Excavation and restoration work at the antique city of Perge

Antalya (AA)— Excavations and restoration continue in the antique city of Perge in Aksu, Antalya.

According to Prof. Dr. Jale İnan of Istanbul University the heating system of the Tepidarium (warm bath) in the north of the city and the southern half of the Caldarium (hot bath) have been discovered and are being renovated. The geometrical floor mosaic of the West Portico of the Palaestra (gymnasium) was completely uncovered and cleaning is in progress.
